# PROVIDENCE INTERIORS

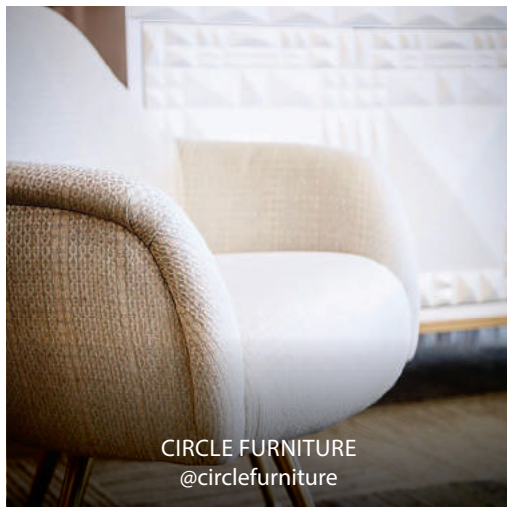

"We love the quality and comfort of LEE products,  
as well as the options for customization. Not to  
mention that it's all hand made in the USA!"

# SHAUN SMITH

---

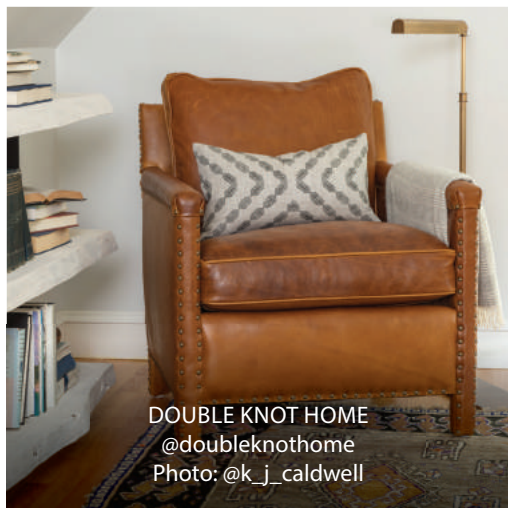

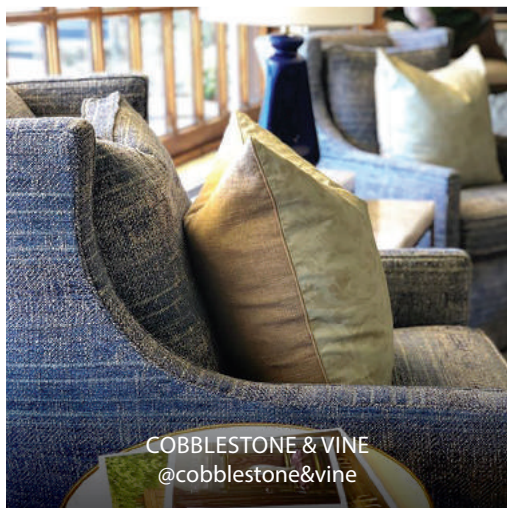

" The options for designing homes of different styles and periods when it comes to upholstery can be tricky, but Lee takes the guess work out of it. Whether I am working on a historic New Orleans home or a Modern oceanfront condo in Laguna, CA, I know I can get a quality and luxurious product that stands the test of time from Lee. My clients range in age from just out college, to a couple well into their 80's that want to spice up their existing decor. I can easily achieve a furniture plan for both sets of clients from Lee that is both stylish and age appropriate. "

# LINDSEY FRANK DESIGN

---

"Our first piece of "grown-up furniture" was the 3583 Sectional from Lee nearly 6 years ago. Not only has it held up beautifully, (with two toddler boys, that's a fete!) it still looks like it was delivered yesterday.

Because of my own personal experience with the brand, LEE has become my go-to for a clients home furnishings. No matter your style, or the stage of life you are in, they offer the most versatile collection with an ever-growing selection of both high end and family friendly fabrics, and for a designer-mom, that's a match made in heaven."

# STEPHANIE KRAUS

---

"We specify Lee Industries furniture for our clients because all of their pieces are extremely comfortable and the frames can be customized. Lee's also an industry leader in manufacturing environmentally-friendly products. All of their products use water based finishes and wood from certified sustainable forests, and made in the United States. "
